

Welcome to our Lowell Instruments newsletter!

We created this newsletter so that our customers can stay informed about the latest updates from Lowell Instruments. We plan to send out quarterly updates. If you wish to opt out you may [unsubscribe](#) at any time. Thank you for reading.

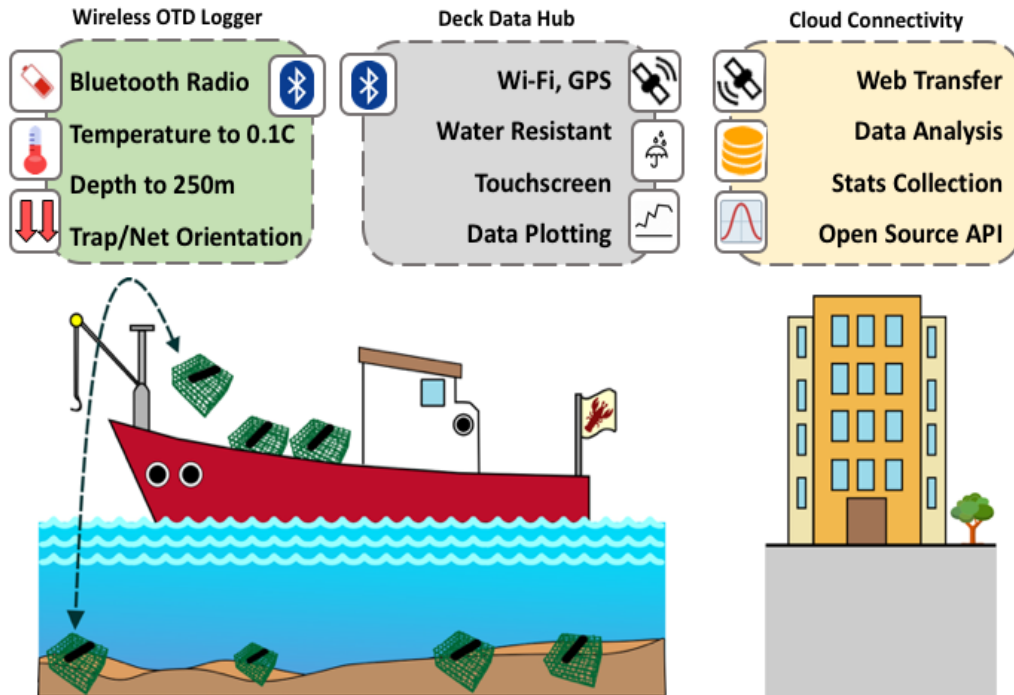

In this Spring 2019 newsletter:

On Deck Data System
Field Application Story
New Domino Software
Battery Replacement Tip

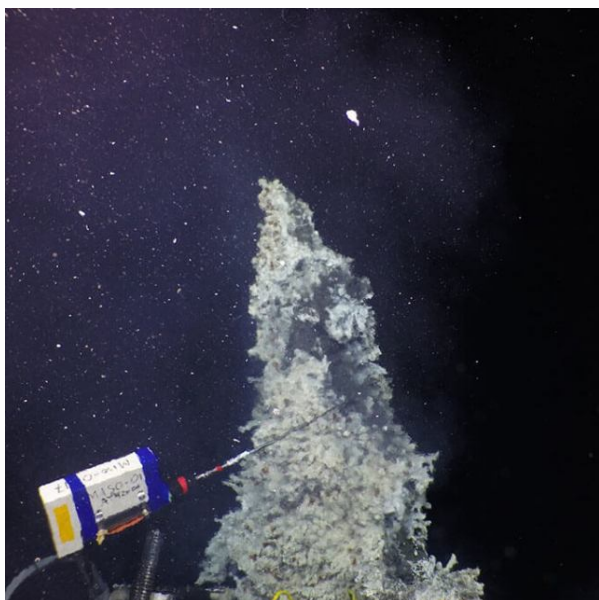

ON DECK DATA SYSTEM

We are looking for partners and collaborators for our newest IoT Fishing gear, the On Deck Data System. The Deck Data Hub and OTD Loggers create a wireless monitoring system for recording orientation, temperature and depth measurements.

On Deck Data System

To learn more about this system and ways you can use it for your research, contact us or click here: [ON DECK DATA SYSTEM](#)

FIELD APPLICATION

STORY:

Hydrothermal Vents in Mid-Ocean Ridges

Dan Fornari (WHOI) and Thibaut Barreyre (U. Bergen) are using Lowell Instruments' sensors in high-temperature loggers to understand fluid dynamics and impacts in hydrothermal systems. Read about the application

here: [HYDROTHERMAL VENTS](#)

NEW SOFTWARE RELEASE:

Introducing **DOMINO**, our newest software. Currently in Beta testing, Domino will replace MATLAB with a Python based platform that is faster, easier to use and is open source. For more details go to: [DOWNLOADS](#)

TOOLS TIP:

Have you thought about replacing batteries on your current meters recently?

Batteries should be checked and replaced if needed before deployment. It's easy with a battery replacement tool kit and replacement batteries available for purchase: [ACCESSORIES](#)

Lowell Instruments is committed to creating tools and solutions to help you with your research. We want to hear from loyal customers like you. Follow us on Twitter at @Lowell_Inst or Facebook and let us know what you think about our products and customized support.

Thanks,
Nick Lowell, Founder & President
